

BETTER ENERGY BANYULE

INDUCTION COOKTOPS

Benefits of Induction vs. Gas Cooktops

Energy Efficient

Only the pan is heated. No energy gets wasted heating air. Induction cooktops are **85% efficient**. Gas stoves only 32%.

Faster

Induction cooktops boil water **twice as fast** as gas as no heat is lost to the surrounding air.

Healthier

Induction stoves **do not** emit any **toxic gases** into your house.

Immediate Response

No grate, coil or radiant burner to heat up. As all the energy goes directly into the pan, the temperature can be raised or lowered virtually **instantly**.

Safer

As there is no flame or heat after removing the pan, means **no danger of accidental burns** - especially if you have young kids! There will also never be a gas leak.

Easy to Clean

An induction cooktop is one smooth, **easy to wipe clean** ceramic glass surface. No more baked in grime.

How does it work?

Induction cooktops use **electric currents** to directly heat pots and pans through magnetic induction.

Instead of using heat from flame, induction heats the pot itself almost **instantly**.

Your cookware must be made of a **magnetic-based material**.
(e.g cast iron or magnetic stainless steel)

Standard Product

Brand, Size & Model Number	Price - Supply & Install (excl. GST)	Potential Price After Rebates (excl. GST)
Artusi - (Domino AID32A) 3.5kW (2 burners) 288mmx520mm	\$1,730.00	\$730
Omega - (OCI64PP) 2.0kW (4 burners) 590mmx520mm	\$1,790.00	\$790

Premium Product

Brand, Size & Model Number	Price - Supply & Install (excl. GST)	Potential Price After Rebates (excl. GST)
Westinghouse - (WHI323BC) 3.7kW (2 burners) 300mmx520mm	\$2,330.00	\$1,330
Westinghouse - (WHI633BC) 6.5kW (3 burners) 590mmx520mm	\$2,330.00	\$1,330
Westinghouse - (WHI643BC) 6.5kW (4 burners) 590mmx520mm	\$2,500.00	\$1,500
Euro Appliances - (E60IDB) 6.5kW (4 burners) 580mmx510mm	\$2,240.00	\$1,240

Why these brands?

- ✓ very high energy efficiency
- ✓ reputable brands widely installed in Australia
- ✓ attractive warranties

When choosing the size of your cooktop, take into consideration the size of your family, how often you use your current cooktop, and available space.
